

Talia Schmitt: A Junior majoring in Environmental Science and Latin American Studies. Talia is working on a local family farm where the food then comes back to the dining hall. She is excited to raise awareness about the farm project and bring students on campus there to volunteer!

Sophie Delzell: A junior majoring in Environmental Geology. Sophie is working for the Meatless Mondays Campaign and promoting healthy, sustainable dining on campus.

Julia Moore: A junior majoring in Public Policy and Environmental Science. Julia is working for the Composting and Recycling Campaign and promoting waste reduction in our dining halls.

Natalie Steinberg is a junior majoring in Environmental Science and Sociology. Natalie is working for the Composting and Recycling Campaign and educating the campus community about food and solid waste reduction and diversion.

Carolina May is a junior majoring in Biology and Environmental Science. Carolina is working with volunteers and other interns to grow and harvest fresh produce at Kelrae Farms and promote locally grown food on campus.

Stephanie Wang is a senior majoring in physics. She is working for the Composting and Recycling Campaign, with the goals of raising awareness about composting on campus and reducing food waste.

Rachel Layko is a sophomore majoring in Biology. Rachel is working with other interns and volunteers at Kelrae Farms. She is working to raise awareness about locally-sourced foods and to increase student involvement in growing the foods they eat.

Jolene Mafnas is a senior double majoring in Kinesiology with a concentration in Public Health and Environmental Science and Policy. She is working on the Meatless Monday campaign while promoting healthy eating and sustainable dining at William and Mary.

Liz Jacob is a senior hailing from the great city of Cleveland Ohio. Liz is double majoring in Environmental Science and Policy and Marketing with a concentration in Sustainability. She is harmonizing marketing and promotion efforts across the intern committees to make sure students are aware with how campus dining intersects with sustainability.

Kendall is a sophomore at the college hoping to major in Environmental Geology. As an intern she focuses on collecting data from the farm as well as from the Meatless Monday and Weigh the Waste initiatives. She also hopes to help document the efforts of the Sustainability Interns for posterity and for the general welfare.

Livia Marrs is a Junior in the geology department at William and Mary, concentrating in environmental geology. She works on Kelrae Farms to provide fresh produce and sustainably produced local foods to the dining halls on campus.
